INTELLIGENT FORECASTING & PROFIT-OPTIMIZED INVENTORY PLANNING FOR UNIPRO DISTRIBUTORS

No other industry has felt more mayhem recently than food distribution. Uncertain supply, shifting demand, hoarding, closures, seasonality and increased demand for ultra-fresh products continue to create product stockouts and overstocking of inventory you can't sell.

Stop allowing these uncertainties to feast on your margins. UniPro and Blue Ridge have cooked up a precision forecasting and profit-optimal replenishment solution designed specifically for Food Service, Food Wholesale and Convenience Store Distributors.
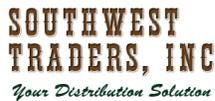

PROVEN RESULTS AT BEN E. KEITH

Decrease inventory by **13.8%**

Reduce overstock **19.6%**

Exceeding service levels of **99%**
